Black Tiger Belgium is a company that specializes in Personal Data Management. Our mission is to create better relationships between companies and their customers, by means of ethical, transparent and innovative ways of dealing with personal data.
In order to complete this mission, we offer solutions in terms of consultancy, technology & services.

Recently, Black Tiger Belgium acquired Black Tiger Belgium. The 40-year old expertise of Black Tiger in combination with the innovative solutions from Black Tiger Group, will lead to Black Tiger Group being a force to be reckoned with.
Black Tiger Group has already left its mark on France, Canada and Poland, and now wants to further develop our grasp in Belgium through Black Tiger Belgium.

For this, we need entrepreneurial & talented profiles to grasp this offering and actively push it on the Belgian market. Your goal is to develop our business through active prospection and a consultative selling approach. We like to focus on long term collaboration and partnerships with our customers.

Personal data today is no joke, and we expect utmost excellence and quality.

We are now looking for a new colleague as:

Java Developer

Your Challenge

You will be part of our Development department, developing products for local and European needs and working in close collaboration with both Black Tiger Technology Department and Group Product Management.

After an intensive onboarding you will take the technical lead on a daily basis on:

- Developing new products for both internal and external clients with clear ownership over the hole lifecycle.
- Technical analysis, continuous integration/deployment/delivery and documentation are part of the job.
- Execute regular refactoring/code hygiene activities to prevent accumulation of technical debt.
- Enforce best practices and standards based on our guidelines.
- Escalating significant architectural/technical issues.
- Adoption of scalable and agile development methodologies.

Your Profile

- You have a Master degree in IT or equal by experience;
- You have preferably a first experience of three to five years in the field of Java programming;
- You have a good knowledge of Java development including Spring Boot framework.
  Knowledge of Bitbucket, Bamboo, Docker, Kubernetes, is a plus;
- You have attention for detail and a problem-solving attitude;
- You are a team player and client- and solution-minded;
- You want to work with and are eager to learn different technologies to choose the best one for the job;
- You fluently speak English and Dutch or French.

Our Offer

As a Java developer, Black Tiger Belgium offers you the opportunity:
- To learn and work with leading-edge technologies.
- To support Top 50 international companies, merely in the financial and telco sectors, to implement true omnichannel customer experience.
- To integrate an international team and work on outstanding and successful products selected and implement them in other regions.
- To realize your professional goals by constantly learn new technologies, familiarize with new industries and products in an international environment that stimulates personal development and teamwork.
- Black Tiger Belgium guarantees an attractive salary and various fringe benefits including a company car.
- Black Tiger Belgium is well located close to the ring and public transportation and promotes a good mix of office based and remote collaboration.

It's time to make your next move and dive into a challenging sales role in the fascinating world of data! We offer an attractive salary as well as an extensive package of advantages and a team of energetic and fun colleagues are included in the job.
