

Black Tiger Belgium, part of the Black Tiger Group is a leading personal data expert company.

Upholding strong values of ethics, transparency & innovation, we support companies to use their client's personal data with full compliancy and to successfully implement and optimize a data driven marketing and operations strategy.

Operating from Brussels, 115 Black Tiger Belgium data experts create and deliver identity solutions (data quality), data management, consultancy and data science services.

Black Tiger's team embarks daily on a real human adventure to create the first solution that focuses on the ethical management and use of data. As an employee, you have the opportunity to shape your own and other's future – a future built on ethics, transparency and innovation.

We are now looking for a new colleague as:

Data Sourcing Manager

The Data Sourcing Manager is responsible for the Data Strategy and manages Data Projects together with the Data Sourcing Specialist, as well as ongoing data operations at Black Tiger Belgium.

Black Tiger Belgium supports customers in reaching highest data accuracy for their owned data sets, strictly in accordance with the GDPR laws and requirements. The company is constantly looking for partnerships, enabling best-in-class Data Quality offering for the customers. Besides that, for some customers, we act as project managers, helping them to manage data operations in complex technological ecosystems, offering outsourced service of data sourcing.

New Data Sourcing Manager will work in close collaboration with the Data Sourcing Specialist, who will be responsible for the execution of the Data Sourcing Strategy of Black Tiger Belgium.

Your responsibilities

- Perform market research (looking for new sources as per needs of the company);
- Take overall responsibility for the strategic sourcing management goals of the company and implement action items to ensure that those goals are achieved;
- Responsible for negotiations for best possible cost service guarantee and develop "win-win" strategies that achieve sustainable relationships with suppliers;
- Negotiating prices for the data;
- Running business analysis;
- Monitor profitability and look for cost optimization opportunities;

- Work directly with customers, helping them to organize and execute data operations with their partners (outsourced service);
- Managing ongoing relationship with the data partners (control of quality, invoicing, delivery issues, etc);
- Setting up contracts, while working closely with DPO and CFO;
- Act as a Product Owner for the Data Sourcing.

Your Profile

- You have an economical, business or computer science related education;
- You acquired at least 5 years of experience in a strategic data sourcing and/or purchasing role;
- You have outstanding negotiation skills;
- You have a high sense of ownership and independency;
- You are self-motivated;
- You have excellent communication skills (written and spoken);
- Positive mindset and can-do attitude;
- Team spirit & high ethical standards;
- Analytical and data visualization skills are a must;
- Full proficiency in English and at least one of the following languages: French, Dutch.

It's time to make your next move and dive into this challenging role in the fascinating world of data! We offer a full-time job as well as an attractive salary with an extensive package of advantages. A team of energetic and fun colleagues are included in the job!
